Experience a safer
and more open world

ASSA ABLOY

Global Solutions

Our story began in 1974, when lock maker Tor Sørnes heard that an intruder had attacked his favorite singer in her hotel room.

Inspired to help, he resolved to invent a security system that would provide a unique key for every guest. His invention changed the whole lock industry.

As industry pioneers we've always led the way – employing innovative technology to make people feel safe and secure wherever they want to go.

ASSA ABLOY Global Solutions has products installed in more than 42,000 properties worldwide, securing in excess of 7 million hotel rooms. We continue to use advanced technology to offer security and peace of mind to both hospitality providers and their guests. ASSA ABLOY Global Solutions's extensive international network covers more than 166 countries.

Mobile Access

A highly advanced mobile phone-based keyless entry solution, Mobile Access has already been installed in tens of thousands of guestrooms worldwide.

Unique User Experience

Mobile Access offers guests a whole new hotel experience. Depending on the solution deployed they can reserve and book their room using their mobile phone or device. They can then use the phone to check in and check out.

Better Guest Experience

By improving service levels and the guest experience, Mobile Access builds customer loyalty as well as the hotel's image and brand. Such a central feature adds value to hotel's mobile strategies, making them more relevant to a hotel's customers.

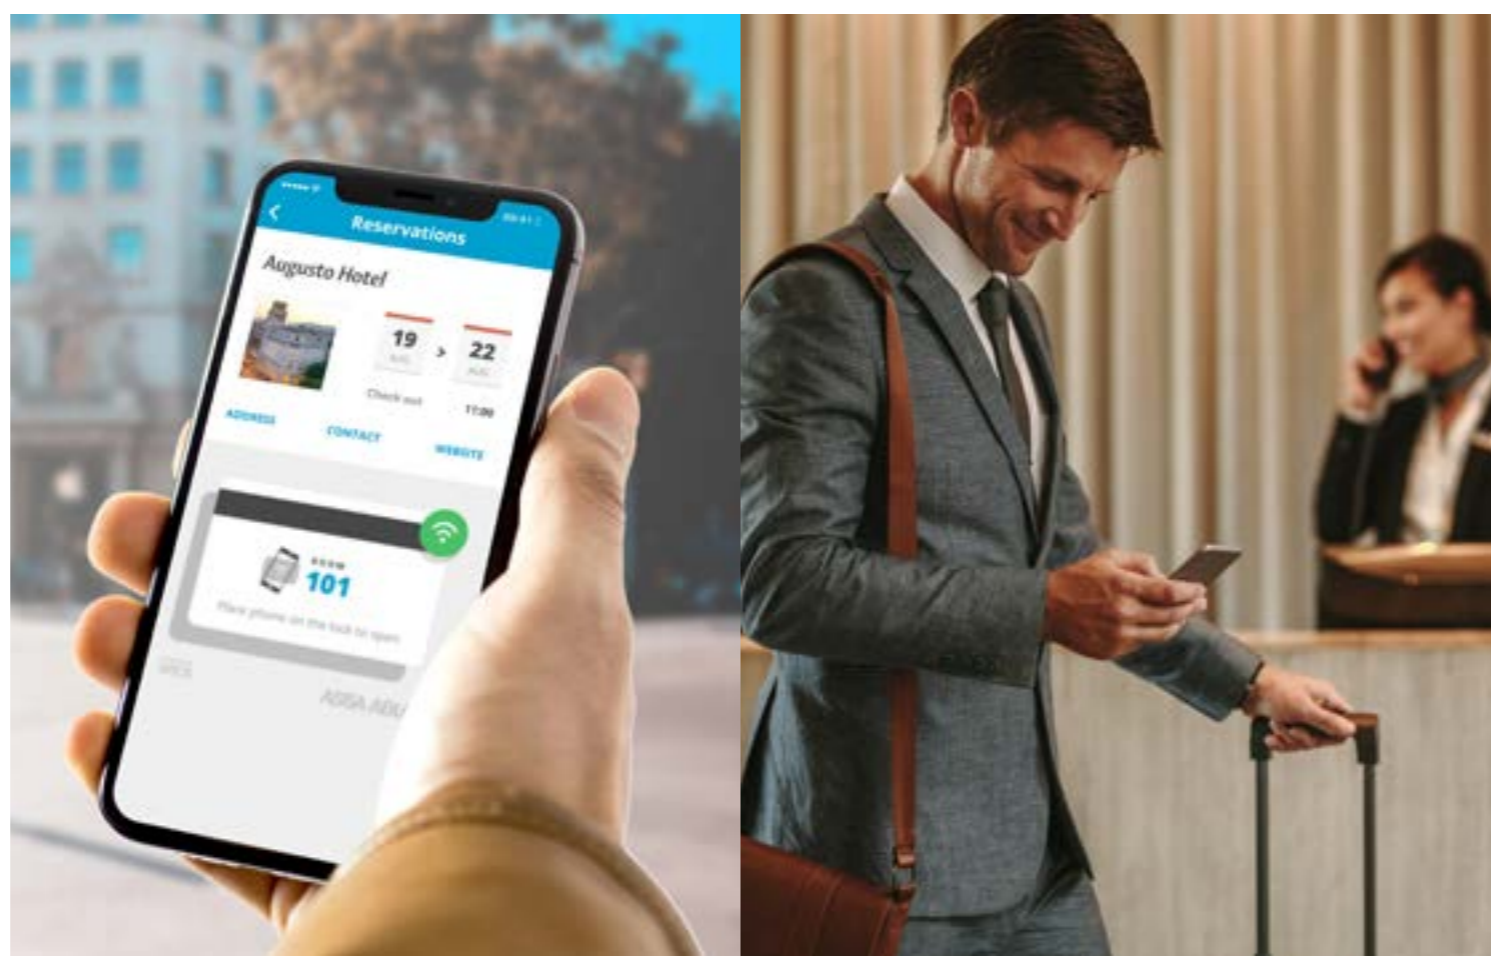

Increased Loyalty and Profitability

Mobile Access technology facilitates one-to-one communication with the hotel guests, ultimately driving customer loyalty and revenue. Together all the benefits of Mobile Access lead to enhanced hotel image and guest loyalty. This, creates more efficient operations that reduces cost driving revenue, improved profitability and increased competitiveness.

How It Works?

- 1 Download the application.
- 2 Make the reservation.
- 3 Check in to the room.
- 4 Bypass frontdesk upon arrival and go to the room.
- 5 Open door with the use of mobile application / mobile key.

Skip Front Desk - No Queues

When guests arrive, guests can go straight to their room using their own smartphone to open the door. No need for keys or keycards. There is no need to wait in a queue at the front desk after a long journey. This seamless experience is secure, convenient and saves everyone time.

Our Mobile Access options for hotels

You can choose between three variants of the solution depending on your needs.

Customer Integration

This solution is created for hotels with their own app initiatives that want to integrate mobile access into their own apps and back end systems. ASSA ABLOY Global Solutions provides a Mobile Access Software Development kit (SDK) together with dedicated onboarding services to facilitate seamless integration.

Third Party Certified Partner App

This solution suits hotels that want mobile app functionality beyond just access control, but don't yet have their own in-house app initiatives. They can here pick a solution from one of our selected app specialist partners, who through our Certified Partner Program already have integrated our mobile access functionality into their products.

ASSA ABLOY Global Solutions Mobile Access App

This is our own ready-to-use, off-the-shelf solution. The app suits hotels that want to provide basic mobile access solutions to their guests in a simple to use format. There are no integrations or third-party dependencies required.

We publish a general app that is available in the App Store and on Google Play. Through an administration portal, hotels can customize their digital key graphics to reflect company branding or design. This will then show in a "Passbook" inspired style for the hotel to use.

Unlock Your Door in a Second with Your iPhone or Apple Watch

With room key in Apple Wallet, guests can access their rooms, elevators, and common spaces like the gym and the pool using just their iPhone or Apple Watch. It's easy, convenient and private. Room key in Apple Wallet integrates into existing access control systems, is simple to distribute and manage, and takes advantage of the built-in security features of iPhone and Apple Watch.

VingCard Locks

Since 1979, research and development has been a key element for us in finding new solutions for the future. By working together as a team, using our learning experience from the market and combining it with our know-how, we are able to develop tomorrow's solutions.

A Total Set of Lock System Solutions

Designed according to the most demanding ANSI grade 1 standards, VingCard's electronic locks are tested to more than 1 million openings. Based on a heavy-duty mortise lockcase and a solid escutcheon, the lock is as solid as it is secure. Stainless steel handles fastened on the inside of the escutcheon with self-lubricating long life bearings ensure maximum security and a true quality touch and feel.

The modular construction makes it easy to change and service parts without changing the complete lockset. Due to our future-proof philosophy the lock software can be upgraded in the field at any time when needs change without changing or removing any hardware.

VingCard Novel

Engineered using a combination of advanced security and guest enhancing technology, there's more than one reason why VingCard Novel represents the future of electronic locks for hospitality. VingCard Novel is an aesthetically attractive product with modern and powerful electronics that is ready for enabling our Mobile Access and online technology when our customers require it. With sustainable manufacturing materials, reduced weight and packaging volume, plus an optional charger for battery-free operation, VingCard Novel takes its responsibility of protecting the environment seriously.

- RFID ready
- BLE & NFC ready
- Wireless (Zigbee)
- Wired (PoE)

Sustainable packaging

VingCard Novel even considers the impact of packaging on the environment. Each lock is delivered using a fully recycled paper box. By significantly reducing the use of harmful plastic packaging materials, VingCard Novel also works towards ensuring a planet free of micro-plastic waste for us all.

Custom-tailored Finishes able to Suit any Interior Design Need

VingCard Novel's enhanced flexibility also extends to its design appearance. In addition to the lock's range of standard finishes, customers can also make requests for custom-tailored finishes depending on their specific needs and order quantity.

Allure

VingCard Allure is a designers' dream. Unique design and exceptional features make Allure more than imagined. Its appearance is not like traditional locks and it is more flexible than ever before. Appearance and functionality can now be chosen based on specific needs and desires for the property. Both Allure Grand and Solo support Mobile Access and can be ready to use simply by adding our BLE module.

Description

- The industry's most advanced and secure RFID technology
- Wall-mounted panel with LED light information indicators
- Wall reader with customizable intelligence and functionality
- Stylish panels with flexible design options
- Illuminated room number option with 16 selectable LED light color themes
- Inside panel for setting "Do Not Disturb" (DND) and "Make Up Room" (MUR) status
- Standalone solution for DND/MUR setting and status display
- Wireless communication between wall and door unit
- Online connectivity with Visionline Wireless (ZigBee) or Visionline Wired (PoE)
- Integration with GRMS

Essence

VingCard Essence revolutionizes the electronic lock industry by housing all lock components, including the reader and mobile access board, inside the door. Reaching the maximum minimalistic expression, it is the true essence of an electronic lock. VingCard Essence is always delivered as Mobile Access ready. With the Mobile Access board included inside the reader, your property is ready for using mobile phones as guestroom keys whenever needed.

Description

- Minimalistic design with electronics inside the door
- Provides a wide range of design options for handles
- RF Online capability (wireless)
- New stylish reader design
- RFID reader with improved reading distance

Signature

With Signature RFID you are provided with a stylish and modern lock that appeals to the modern hotel environment. Signature RFID is less on the door and more for you and your guests in terms of functionality and user friendliness.

Classic

Classic RFID derives from the standard Classic lock and allows you to go contactless in a few short steps if you already have standard Classic installed. With its sleek and elegant design, available in all VingCard lock finishes, you now have a second method of upgrading to RFID functionality depending on your choice of style.

Handle Options

To truly match the style requirements at your property, we also offer a wide range of handle options.

Designers' Handle Collection

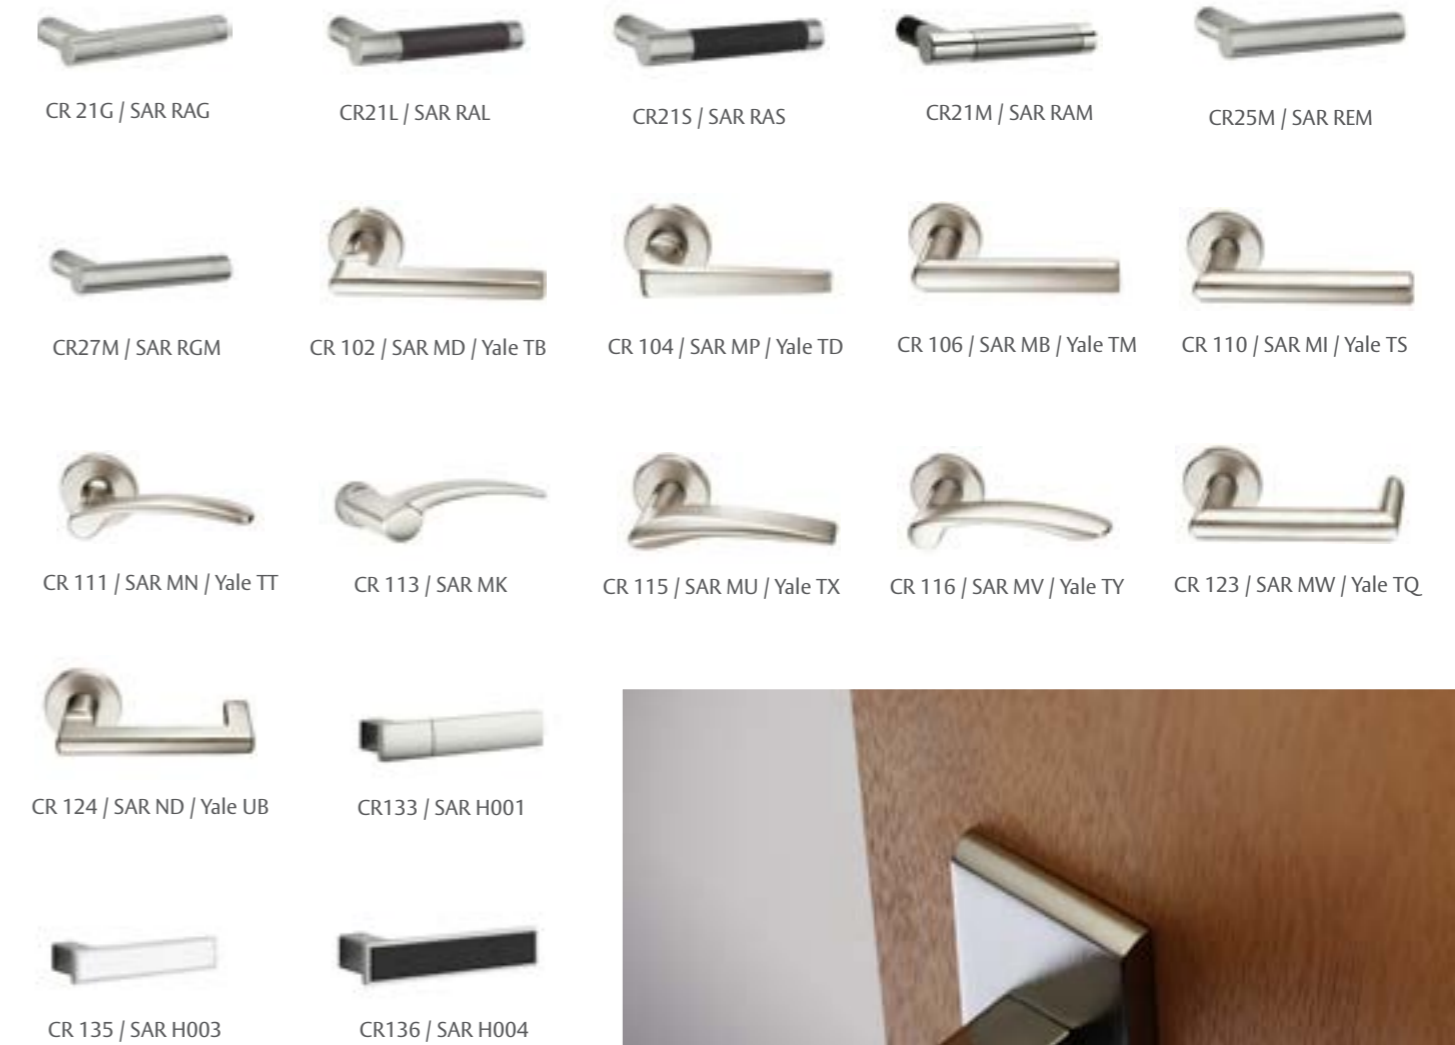

Because your hotel requires the most exclusive and luxury touch, and you want to offer a personal and unique experience to your guests, ASSA ABLOY Global Solutions has created an optional Designers' Collection in order to offer you the most extensive and exclusive designer handles for electronic locks today.

VingCard has partnered with the following renowned designers through the famous Italian handle crafter Valli&Valli: Norman Foster and Partners, Gustav Peichl, Antonio Citterio, Gregotti Associati, Sottsass Associati and Taller Design Ricardo Bofill. Our designer handles are compatible with Signature, Essence and Allure.

SARGENT | Corbin Russwin | Yale Designer Handles

ASSA ABLOY Global Solutions is pleased to introduce an expanded range of designer handles and general product offerings from three of our sister companies SARGENT, Corbin Russwin and Yale. These ASSA ABLOY companies based in Connecticut have over 150 years of experience in manufacturing high-quality commercial grade hardware.

Valli & Valli, SARGENT & Corbin Russwin handles are available 10 different finishes: Polished Chrome, Satin Chrome, Polished Brass, Satin Brass, Titanium, Matt Bronze, Brownish, Matt Black, Polished Stainless Steel, Satin Stainless Steel.

Elsafe Safes

Electronic in-room safes contribute to raising the security level in your hotel, increasing your guests' peace of mind.

Safety Without Compromise

Our in-room safes are tested by the world's most recognized and respected product testing organization Underwriters Laboratories. Elsafe Infinity is the first UL-listed in-room safe in the 1037 category for anti-theft devices. This prestigious UL listing is now awarded to both the Infinity and Sentinel models, including physical break-in tests, endurance tests and jarring tests.

Maximum Level of Protection Possible

The exclusive UL-1037 listing achieved by Elsafe's in-room safes gives you added assurance that your guests' valuables are receiving the maximum level of protection possible. Not only does this protect your guests' property, it also protects your property's valuable reputation.

With Elsafe, your guests can rest easy and so can you.

UL-1037

Infinity II

Elsafe's Infinity II series introduces a new era in hotel in-room safes. Infinity II is ideal for the most demanding hotels, lifestyle brands and boutique properties that strive to be different. By combining sophisticated technology and fashionable design, Infinity II is the ultimate safe for the design-conscious hotelier.

Standard features

- UL-1037 certified for physical security.
- Industry-leading audit trail.
- Confirmation buzzer.
- Convenient inside light.
- Anti-tamper switch.
- Easy outside battery change.
- Unique modular construction for easy upgradeability.
- Spring-loaded door.
- Backlit keypad.

Sentinel II

Elsafe goes beyond the ordinary with its new Sentinel II hotel in-room safe series. We have taken in-room security to a new level and combined it with a functional and trendy design. Sentinel II electronic in-room safe is more than just an in-room safe. It has become an important style element that blends into any environment! This new safe series operates with digital keypad.

System & Software

ASSA ABLOY Global Solutions serves as hospitality's leading provider of integrated software solutions that keep guests and staff members safe throughout every step of the hotel journey. Our cutting edge access management platforms provide hoteliers with the tools they need to always ensure a secure yet seamless hotel environment.

Visionline

Originally developed to maximize the networking capabilities of VingCard's industry leading electronic locking systems, Visionline allows your locks to communicate with the server via online radio frequency (RF), eliminating the need to manually encode keycards, cancel staff cards and check battery life.

Visionline is the only wireless, highly-secured and open standards-based platform to address the unique needs of low-power monitoring and access-control network applications. Operating on a reliable and secure platform like ZigBee provides increased reliability and performance at an affordable cost. In addition, the wireless network enables smooth interface and integration opportunities for other online devices, including safes and minibars.

Standard features

- | | | | |
|--|---|---|---|
|  Lock audit trail |  Cancel guest card |  Change lightbulbs |  Change rooms |
|  Extend stay |  Cancel staff card |  Maintenance |  Door ajar alarm |
|  Intruder alarm |  Low battery |  Open doors |  Passage mode |

Visionline Software Packages

Visionline is modular and consists of several different online modules that can be built as you prefer. These modules are Standard, Advanced, Communication, Safety, Online In-room Safe, Mobile Access and Loyalty program.

Advanced Online Module

- : Door ajar alarm
- : Inside opening audit trail
- : Wandering intruder alert
- : Sequential intruder alert
- : Block cards per user group and section
- : Live tracking of cards
- : Insert maintenance report card
- : Online passage mode activation

Online In-room Safe Module

- : Warning if safe is locked upon check-out
- : Low battery warning
- : Mechanically opened alert
- : Clear safe memory warning
- : Automatic synchronization of date/time
- : Remote audit trail
- : Remote service reports

Visionline

Standard Online Module

- : Central card cancellation
- : Remote audit trail
- : Low battery report
- : Extended stay
- : Room move
- : Auto check-out of guest card
- : Data Warehouse

Mobile Access Module

- : Manages ASSA ABLOY Mobile Access credentials

Safety Module

- : Open doors from a central location¹
- : Close doors from a central location¹

Loyalty Program Module

- : Remote check-in/check-out
- : Bypassing reception queues
- : Using RFID loyalty guest card

Vostio Access Management

Vostio Access Management by ASSA ABLOY Global Solutions serves as a portfolio of cloud-based guest and staff access services for the hospitality industry. The first fully cloud-based platform of its kind.

Move to the Cloud

Let Vostio services live in the cloud alongside your property management system, central reservation system, revenue management systems and other critical systems already in use. Open and secure interfaces allow Vostio to easily communicate with other cloud-based services, including your property's systems and ASSA ABLOY Global Solutions Mobile Access.

Rest easy, knowing that your guest access systems receive the best possible care and attention. Cloud monitoring and management tools ensure 24/7 availability, automated upgrades and secure backups. Always operational, always updated and always backed up, Vostio simplifies the complex.

Vostio Features

Vostio Access Management represents a revolutionary next step and offers a multitude of security and operational enhancing features that legacy access management systems are unable to offer.

Vostio Benefits

Vostio provides guest access management flexibility and control for all types of establishments, whether a hostel, independent boutique brand or upmarket hotel chain. It ensures your guest access services work and opens endless opportunities to interact closely with your guests, while making it easier for your staff to personalize and administer the guest experience.

For Chain/Ownership Group

- Reporting and transparency
- Global data protection compliance
- Secure cloud storage and backups
- No on-premise servers
- Compliance assurance due to automated patch management
- 24/7 availability, scalability and redundancy
- Remote system control

For Hotel Manager

- Easy to install
- Smooth operations
- Cost efficient
- Select the right functions
- Remote monitoring
- Scalable and flexible IT resources
- Audit trails and traceability
- Cloud security against data theft, leakage and deletion

For Front Desk

- Intuitive user interface
- Efficient operations
- PMS integrations
- Space-saving keycard encoding

For Technician

- No local system maintenance
- Asset management control
- Easy troubleshooting and replacements
- Notifications and alarms
- Always secure and monitored

IoT Location Solutions

Location Solutions let you embrace the importance of place as an integral part of your business strategy. It's where you tap into the mindset of your guests. Where you help safeguard employees. Where operations become far more efficient. And where you can create more value for your guests and for your business.

Location Solutions in Brief

- WHO** Your guests, employees and partners
- WHAT** A wireless infrastructure using the Internet of Things (IoT) and Bluetooth Low Energy (BLE) technology to provide integrated real-time and proximity indoor location services
- WHY** Enhance guest experience, ensure employee safety, safeguard assets and streamline operations
- WHEN** As soon as possible to gain competitive advantage
- WHERE** Throughout your property
- HOW** Sensor beacons and gateways use BLE, a de facto standard, to connect guest and employee smartphones and share data on guest preferences and location with the cloud.

Hotel Asset Management

Hotel Asset Management as part of Vostio Location Solutions allows the hotel to track mobile equipment such as folding cribs and maid carts, ensuring that these asset could be located anytime within the lodging facility's confines.

Know where your assets are and that your equipment works as it should. Manage equipment performance and ensure preventive maintenance eliminates unplanned breakdowns that inconvenience your guests. Create a reliable, cost-effective wireless infrastructure for indoor location services. With our Location systems smartphones, beacons, badges and gateways all send location data to your systems through the cloud.

Main Benefits:

- Rapid, simple deployment
- Software driven with minimal infrastructure
- Location accuracy within two meters (RTLS) Zone location (PLS)
- Over 200 APIs and Kinesis real-time data streams
- Supporting an eco-system of smartphones, iBeacon & Eddystone BLE beacons along with Location Solutions' robust signal scanning technology

Staff Safety

With Location Solutions- Staff Safety, hoteliers can finally provide their employees with the peace-of-mind and assurances of safety that they seek when at work. Staff Safety fully caters to the 5-Star promise by the American Hotel and Lodging Association (AHLA), a commitment by the industry's major hotel brands to provide staff with a seamless method of requesting help the moment they feel threatened.

Guaranteeing Staff Safety in Three Easy Steps

1. Click the button
2. Pinpoint Alarm Location
3. Send security

1. Threatened employee activates personal device.
2. Device transmits distress signal to nearby BLE gateway. BLE gateway transmits signal via cloud to first responders.
3. First responders receive text message with precise floor and room details.

Accessories

ASSA ABLOY Global Solutions offers an extensive range of accessories and security hardware options to complement your hotel locking system and provide enhanced security. These include such items as keycards and RFID carriers, as well as complementary hardware for cohesive guestroom design, such as bathroom locks, door retainers, door viewers. Back-of-house and facility access hardware, such as elevator controllers, exit devices and more are also included in our product range, and are designed to meet various standards.

RFID Carriers

ASSA ABLOY Global Solutions offers a wide range of RFID carriers that are especially designed for different applications (for guests, staff or VIP guests) and give you the opportunity to enhance your guests' experience at your hotel.

Keycard

Mobile device

Wristband

Keyfob

ECO-FRIENDLY KEYCARDS

Meet hotel guest sustainability expectations using a wide range of environmentally friendly key options to suit any need.

Choose between pulper, paper and wooden key card depending on your wanted look and feel.

RFID Remote Controller

This independent unit provides access control to common doors, such as parking, health clubs, conference suites, staff entrances or guest night entrances. VingCard Remote Controllers are fully compatible with all of VingCard's card locking systems and Mobile Access compatible.

RFID Elevator Controller

VingCard's Elevator Controller is designed to be built into the elevator panel and operates offline. The security level of the hotel will increase, as only guests with a valid keycard will have access to the elevators/floors. The Elevator Controller is compatible with all of VingCard's card locking systems and is Mobile Access compatible.

RFID Exit Device

Our Exit Device works with your VingCard electronic card locking system. This makes it possible to use encoded cards to control all guest and staff access to the building, while providing a panic exit device to satisfy all safety considerations for emergency exit. Opening the door from the inside is achieved by simply pushing the push bar.

Mechanical Locks

VingCard's Bathroom Lock has an occupancy indicator and a thumb turn, making it easy to change the lock case handing from left to right. The Bathroom Lock is delivered in Satin Chrome, Satin Brass, Polished Chrome and Polished Brass.

Mechanical Locks for Back of House

The VingCard 1000-series cylinder locks are designed to complement VingCard's electronic locks, ensuring uniform appearance in guestrooms and corridors.

- Available in ANSI and EURO.
- Staff key will fit into cylinder keyways.
- UL-fire listed.
- Finish Materials: Satin Chrome, Satin Brass, Polished Chrome, Polished Brass.

Door Retainer

ASSA ABLOY Global Solutions Door Retainer prevents entry of intruders and increases the resident's safety. Is delivered in Satin Chrome or -Brass and Polished Chrome or -Brass.

Energy Control Unit

ASSA ABLOY Global Solutions offers a complete range of in-room Energy Control Units, the perfect combination for providing in-room comfort to your residents while, saving energy and money when they are away from their rooms.

Polarbar Minibars

Polarbar offers a wide range of minibars. For more information about Polarbar, please visit: assaabloyglobalsolutions.com
